## Summary

Entry-level Web Developer with a year of projects experience in Next.js , React.js , and JavaScript. Proficient in crafting reusable components tailored for enterprise-grade web applications. With a passion for innovation and a drive for excellence, I am poised to contribute effectively to cutting-edge projects in the world of web development.

## Projects

### ChatApp [click](#)

April 2024 – May 2024

- Developed ChatApp, a real-time messaging application using Next.js, MongoDB, Prisma, NextAuth.js, React Spinner, Date-fns and other modern technologies.
- Key features include real-time messaging, media sharing, group chats, and flexible authentication options.
- Implemented responsive design for seamless user experience across devices.
- Contributed to project documentation and actively involved in bug fixes and feature implementations.
- Demonstrated ability to work collaboratively in a team environment and contribute effectively to project development.

### Netflix Clone [click](#)

February 2024 – April 2024

- Developed a Netflix clone using Next.js, Tailwind CSS, and Shade UI, with authentication via NextAuth.js and database management with Prisma and MongoDB.
- Ensured responsive design, efficient media streaming, and robust testing. Deployed with optimizations and comprehensive documentation, collaborating via Git for efficient development..

### AmazonPro [click](#)

November 2023 - February 2024

- Crafted user-friendly interfaces with a keen emphasis on intuitive navigation, delivering a seamless shopping experience that delights customers.,
- Created secure stripe payment gateway, ensuring transaction safety and reliability for user during checkout process
- Optimized backend systems, utilizing technologies such as, React, MongoDB, Stripe, Tailwind Css, Mongoose, JWT for authentication and Tailwind to enhance platform performance.

### GlobalNews [click](#)

December 2022 - February 2023

- Developed a React-based desktop application for personalized news delivery.
- Enabled reading thousands of daily news articles with a user-friendly interface.
- Technologies: React for frontend, REST API (NEWS API) for fetching news, and additional React libraries.

## Skills

- |              |              |                                 |
|--------------|--------------|---------------------------------|
| • React      | • Express.js | • SQL & MongoDB                 |
| • JavaScript | • Next.js    | • Version Control (Git, GitHub) |
| • C++        | • REST API   | • Tailwind CSS                  |
| • Node.js    | • MongoDB    |                                 |
